Mobile No. - 6394969055

## OBJECTIVE

Looking for a internship or Job to gain industrial experience and training . Excited to work with the professionals and to learn new work ethics .

## EDUCATION

### Post Graduation Certificate In Big Data Technologies

CDAC Bengaluru

Feb 2026 - Present

### B.tech in CSE(Data Science) with 7.4 CGPA

RKGIT, Ghaziabad affiliated with AKTU

(2020 - 2024)

### Intermediate with 74.8%

D.A.V. Inter College , Mahoba  
with State Board

(2020)

### High School with 78%

S.S. Niketan High School , Mahoba  
with State Board (2018)

(2018)

## PROJECTS

### Fake news prediction

- Developed a ML based fake news prediction model using logistic regression for accurate misinformation detection.
- Achieved robust fake news classification with a logistic regression approach in Python.
- Used libraries like pandas , numpy , scikit-learn , nltk .

### Flipkart Website data Scrapping

- Web scraping streamlines data collection from websites, enhancing efficiency and enabling timely insights for a wide range of applications, from market analysis to content curation.
- The project utilizes BeautifulSoup for HTML parsing, CSV for data storage, and Pandas for data manipulation, creating a powerful tool for web data extraction and analysis.

### Kaggle competition (House Price Prediction using advance regression techniques )

- Developed a Python-based house price prediction model leveraging libraries like NumPy, Pandas, Matplotlib, Seaborn, and XGBoost for robust data analysis, visualization, and machine learning.
- Implemented model persistence using Pickle to enable easy storage and retrieval of trained models, ensuring seamless deployment and reusability.

### Real-Time Sentiment Analysis Dashboard

- Designed and implemented the NLP preprocessing workflow.
- Built and optimized the sentiment classification model.
- Created an end-to-end ML pipeline for training and prediction.
- Evaluated model performance using accuracy, precision, recall, and F1-score.
- Integrated model outputs with the dashboard for real-time sentiment monitoring.

## SKILLS

- Python , Core JAVA
- SQL , MongoDB
- Machine Learning & Data Visulization
- AWS
- Hadoop , Map Reduce(MRJob)
- Version Control - Git
- Flexible with technology
- Passionate for Research
- Organizational Skills
- Conflict management and negotiation
- Effective Communication and Leadership
- Good Analytical and logical thinking

## TRAINING & CERTIFICATIONS

|      |                                                        |
|------|--------------------------------------------------------|
| 2022 | Data Analytics with AWS - Coursera                     |
| 2023 | Data Analysis With R programming - Coursera            |
| 2023 | Basic Map Reduce (Grate Learning)                      |
| 2023 | Certificate from CDAC in Big Data Technology - Nasscom |
| 2023 | DA & Advance ML Intern and technical Trainee - MSME    |
